SEALED AGENT

Don't trust promises. Seal the deal.

Escrow agent for business deals and negotiations.

Program ID 3WSjgWUKWhsENKJ1ibnbgvaiuQ8THJp4Mp7uGTUyeYeJ · Solana devnet

THE PROBLEM

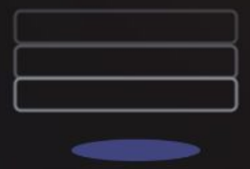
Every handshake deal breaks the same way.

Buyer pays first.

Seller stalls. The wire is gone, the chase is on WhatsApp.

Seller delivers first.

Scope dispute. Invoice unpaid 60 days. Relationship broken.



Both hire lawyers.

A $12k contract for a $20k deal. Trust priced as overhead.

The money moves. · The trust doesn't.

THE THREE AGENTS

Three AI agents. One on-chain deal table.

One engine, three roles. Each does the work a bank or lawyer would charge for.

STRUCTURER

Chat in, deal out.

Describe the deal in plain language. EN or ID. It drafts the escrow.

NEGOTIATOR

Speaks for each side.

Both wallets get an agent with red-lines and history. They counter until they agree.

VERIFIER

Reviews delivery proof.

Seller uploads proof. Verifier scores it. You approve.

HOW IT WORKS

Five steps. One signature per milestone.

01

Describe.

Chat the deal in plain language.

02

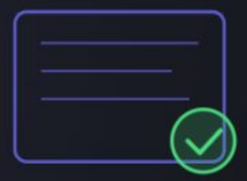
Negotiate.

Agents counter on both sides. You accept the summary.

03

Fund.

One signature. USDC enters the on-chain vault.



04

Verify.

Seller uploads proof. Verifier scores it. You approve.

05

Release.

One tap. That milestone pays. Not the pot.

Recovery path, also shipped. Mutual refund returns USDC when both sides sign. Pre-funding deals cancel off-chain.
